

RICHARD MRAZ, P.Eng.

My name is Richard Mraz and I am seeking re-election to the Board of the West Toronto Chapter of the PEO. I am a licensed and practicing Professional Engineer at Sunnybrook Health Sciences Centre with a degree in Systems Design Engineering from the University of Waterloo.

My volunteer experience in the PEO Chapter system began over 10 years ago with the North Toronto Chapter, where I served as both webmaster and vice-chair. I was later a founding Board member of the West Toronto Chapter, continuing in my role as webmaster for the last several years. I am an active participant at Board meetings and an advocate for change in terms of PEO's outdated PRISM system, along with its web and social media presence. While I would like to be involved in event planning for the 2015/2016, my interest remains on the IT side and I will provide required support to the newly formed IT Committee.

Thank you for your consideration and support.
