

GEORG A. M. KRALIK, P.Eng. FEC, Past Chair - West Toronto Chapter
Candidate for West Toronto Chapter Executive

My name is Georg Kralik. I am a Professional Engineer, and for the last year also a Fellow of Engineers Canada. I am now retired from a 35 year career in Ontario Hydro/Ontario Power Generation - Nuclear, designing containment structures for the Bruce B and Darlington Nuclear Power Plants.

I started volunteering on a chapter executive in 2004, first in the former North Toronto Chapter, and then starting in late-2008 in the newly formed West Toronto Chapter.

Over the last 11 years I have held, and still hold a number of positions in the Chapters.

I started out, and still hold the position of License Presentation Coordinator, originally in the two annual PENTA ceremonies, and after the chapter boundaries reorganization the two annual QUAD Chapters ceremonies.

For the last two years of the North Toronto Chapter I was also Chair (2006 to 2008), and I became the second chair of the new West Toronto Chapter (2009 to 2011).

My interest in education outreach, and promoting an engineering career to students in our schools also led me into volunteering for the last 11 years with FIRST Robotics to become a judge in the Ontario Regional competitions.

Other positions I am currently still holding in the chapter are Vice-Chair of the Women-in-Engineering sub-committee, and chair of the West Toronto Chapter Engineer-in-Residence program. As an EIR, I have been assigned to a class of Grade 8 students at the Cedervale Community School.

I would appreciate your support and vote of confidence in this Executive election.

. . . and if you still don't know me, just look for the big camera, and all the event photographs which have been posted to the chapter websites.

Thank you . . .
