

Marina Freire-Gormaly has served with the West Toronto PEO chapter most recently on the Education Committee. Marina is currently pursuing a doctoral degree in Mechanical Engineering at the University of Toronto. By continuing on the WTPEO executive, Marina can contribute her knowledge, connections and strengthen the PEO chapter's ties with the university and with industry. This coming term, I hope to contribute further to the delivery of exciting and engaging events for the members of this chapter, for example through a mathematics competition in early fall 2015.
