

Newsletter Report: by: Jeff Weisman, P.Eng.

'The newsletter serves as the mass communication from the WTPEO executive to its members, published twice annually, in early September and just before year's end. While Facebook, Twitter and the website are all now available to us as outlets, they are still voluntary options, and, being the Engineers that we are, we don't use them all that much, preferring to get on with the tasks at hand [laughs, I hope]. The newsletter is the one non-optional summary of events that gets out there, via e-mail, snail mail if the PEO has no e-mail address for you, and, yes, the website. Every newsletter contains the Chairperson's message and the complete list of WTPEO executive and non-voting volunteers, the latter including the newsletter Co-ordinator. Annually it includes the listing of new P. Eng. licence recipients in our district (thank you, Georg), it announces this AGM, and otherwise it includes voluntary updates from the various committees that you are hearing about this evening. It runs to a maximum of four pages, it is text only due to PEO restrictions, and the font size is the newsletter Co-ordinator's friend, filling out those editions when submissions are few, and shrinking to a minimum of 9 (again, PEO rules) when they are many. Thank you.'
